Overview

There has been an increasing shift towards online learning by universities, colleges and schools amid COVID-19 as to promote the continuity of learning. eLearning has become more than ever widespread and this phenomenon is expected to continue beyond the pandemic as anticipated by many experts in the field.

Instructors all over the world were required to quickly transition their teaching online and now are asked to shift from emergency remote teaching to more meaningful learning experiences that engage students and help them meet their learning outcomes.

The aim of this interactive webinar is to introduce participants to the definitions and fundamental principles of online teaching and offer them a range of tips and guidelines that will help them better engage students and create an online presence.

Participants will be exposed to various types of online course delivery strategies (i.e. synchronous, asynchronous, blended, et.) and will explore how online learning differs from the traditional face-to-face learning and what sort of skills and competencies shall students and instructors acquire to ensure a successful learning experience.

Participants will also explore how they can effectively plan their online courses considering aspects related to course content, learning activities, student engagement and the role of feedback as well as how they can create a good online presence and build active learning communities.

Webinar Objectives

By the end of the webinar, participants should be able to:

- Identify the main characteristics and skills required to create a successful online learning experience
- Understand the main differences between teaching face to face (f2f) and teaching online and how to prepare students for their online learning experience
- Consider different possible formats for the delivery of online courses
- Rapidly and effectively plan their online course and transition to online teaching
- Define what is effective online ‘content’ and how content is planned and presented to meet specific learning outcomes and engage students
- Integrate various tools (primarily those included in your LMS) to engage students in their learning
- Reflect on your current teaching online practices and make improvements as deemed necessary

Target Audience

The webinar is relevant to anyone involved in delivering or overseeing online learning including:

- Educators, Faculty and Teaching Staff
- Deans, Heads of Departments
- Staff working in Teaching and Learning Centers
Overview
This webinar aims at supporting instructors and teaching staff during their transition to online learning and will focus particularly on student assessment strategies that are believed to be the most effective in an online environment.

Online learning is not a new way of learning and has been around for quite some time; throughout the years, significant research and practice were carried out to identify the best way to implement student assessment in an online environment. A wide range of strategies have been identified to safeguard the effectiveness, rigor and quality of student assessment when courses are delivered online. This include among many strategies: integrating ongoing formative assessment; using a variety of assessment strategies to accommodate different learning styles; relying on collaborative, peer and self-assessment and carefully designing assessment components that are performance based, authentic and which promote academic integrity.

Assessment techniques including the use of online quizzes, discussion forums, projects, portfolios, blogs and wikis as well as peer and self-assessments will be discussed during the webinar. Moreover, the role of meaningful feedback cannot be overemphasized when it comes to online learning and the webinar will tackle the main characteristics of meaningful feedback and the different ways and techniques to provide effective feedback to students.

Webinar Objectives
By the end of the webinar, participants should be able to:

- Understand the key principles for moving assessment online
- Design assessment strategies that are suitable to the nature of online learning: What should I be assessing?
- Use effectively various educational technology tools to support student assessment
- Understand the role and importance of meaningful feedback in online learning
- Comprehend and know how to address issues in managing quality and standards in online assessment (i.e. dealing with plagiarism and authenticity)
- Reflect on current institutional/personal student assessment practices

Target Audience
The webinar is relevant to anyone involved in delivering or overseeing online learning including:

- Educators, Faculty and Teaching Staff
- Deans Heads of Departments
- Staff working in Teaching and Learning Centers
Overview
Creating effective student engagement in online courses, can be a daunting task for many instructors new to teaching online, and is strongly dependent on how well the course was designed. While online course design is rooted in the same solid principles of face-to-face teaching, it requires additional considerations when it comes to course structuring and layout, content delivery, student motivations, learning activities and even student assessment which need to be tailored to the particular nature of online delivery. For students to remain engaged and active throughout their learning, instructors will need to carefully plan, design and deliver their courses. Student will need to be motivated in different ways and may require a greater level of clarity, support, guidance, coaching and mentoring.

This webinar will focus on the key considerations instructors have to keep in mind when reviewing their courses for online delivery to ensure their suitability to the new delivery month and ensure both an engaging and smooth learning experience.

Webinar Objectives
By the end of this webinar, participants will be able to:
• Understand the fundamentals and principles of instructional design
• Use principles of backwards design to plan a course or module that includes synchronous and asynchronous elements
• Design effective and engaging learning experiences in line with the articulated course outcomes
• Explore the essential ingredients of what constitutes a high-quality online learning and how to create an online presence
• Learn to design structured course content to maximize student retention
• Understand copyright and accessibility standards.

Target Audience
• Faculty and Teaching staff
• Deans and Heads of Departments
• Instructional designers
• QA staff
Overview
The global educational landscape has witnessed over past few months’ significant changes in its operations due to sudden and rapid shift towards remote and online education as to promote the continuity of learning during the COVID-19 Pandemic. Universities and colleges all over the world are under pressure to transition from emergency remote learning to more meaningful and engaging quality learning experiences.

Online and blended education has become more than ever widespread that is expected to continue beyond the pandemic. Higher Education Intuitions (HEIs) across the globe has embraced online learning with different degrees of maturity and will need more than ever to ensure the highest level of quality is maintained not only for its programs and courses but for the overall student experience.

HEIs will need to revisit their current QA systems and practices to ensure they are ‘fit-for- purpose’ to address this new type of learning. Online/ blended learning will need to be integrated as part of the overall strategy for the institution’s and will need to give attention to curriculum design, course design, teaching practices, the production of instructional materials, the preparation of faculty members to teaching online and student support among other areas.

During this four-hour webinar; participants will explore the various dimensions when evaluating the quality of online education and will get familiar with the existing frameworks and models and how these may be used as benchmarks. Special emphasis will be given to the quality of programs and courses. Participants will also be immersed in thinking about articulating/ revising their strategies, policies and plans for online delivery and will reflect on their current QA practices and determine their suitability for this new form of learning.

Webinar Objectives
By the end of the webinar participants should be able to:

- Understand online and blended learning in the context of quality and quality assurance
- Identify key issues and evidences for quality and quality assurance in online education
- Determine the various quality dimensions for online education in the specific context of their institution
- Comprehend the various existing frameworks and models for evaluating the quality of online programs and courses
- Develop an integrated approach to strengthening quality assurance for online and blended learning
- Reflect on institutional current QA practices and make adjustments as deemed necessary

Target Audience
The webinar is relevant to anyone involved in developing technology enabled programs as well as those overseeing the quality of programs and services included those delivered remotely whether fully online or blended. This include

- Vice Presidents for Academic Affairs/ Provosts
- Deans and Heads of Academic Departments
- Directors and staff working in QA, Institutional Effectiveness and Accreditation, Accreditation Offices
- Directors and staff working in Student Services and Academic Support Deanships and Units
Overview

Academic advisors play a critical role in maximizing the student learning experience as well as supporting and engaging them. Students rely on advisors for academic information, assistance in navigating the university, locating and understanding policies and procedures, and problem-solving and decision-making (Smith & Allen, 2014).

Well-designed academic advising services also support students’ intellectual growth, empower students to clarify and attain their diverse academic, personal and professional goals, foster student retention, and promote student success.

While a student studying on campus may find it sometimes challenging to locate offices and engage with their academic advisors beyond obtaining course approvals; online students may struggle event more and have a feeling of being lost, as they do not have the opportunity to develop the contextual framework associated with buildings, faces, and in-person referrals. Moreover, the culture and expectations of online students may differ from those of campus-based student.

It is important that academic advisors adopt a proactive approach and take into consideration the unique needs and limitations that online students may have. Advisors are encouraged to offer students a variety of options regarding how students can receive advising, making sure to understand the needs and preferences of each individual student. Regardless of the method of delivery, each advising session should make the student feel cared for, understood, and valued.

Moreover, both institutions and advisors should come together to continually monitor the quality of academic advising and the impact it is having on the student learning experience.

This webinar aims at identifying the broad range of understanding, knowledge, and skills that support academic advising in online environments. It will acquaint participants with different strategies, tools and techniques to enhance their advising practices and consider how technology be may exploited to offer a better and more personalized advising experience.

Webinar Objectives

By the end of this webinar, participants will be able to:

• Comprehend various advising philosophies, approaches and models and determine which are more suitable to you and your students
• Understand the difference between advising students in a face to face environment and advising students online
• Consider the NACADA Academic Advising Core Competencies
• Model within their advising practices
• Integrate the use of various technologies to deliver academic advising services
• Appreciate what it takes to build a proactive and engaging relationship with their e-Advisees
• Use various principles and tools for assessing online academic advising

Target Audience

• Academic Advisors
• Directors and Staff working in Student Services Units including Career Advising, Counseling, Tutoring Centers, etc.
• Heads of Academic Departments and Program Directors responsible for overseeing academic advising
Overview

It is widely acknowledged that institutions of higher education are facing a host of strategic and operational risks. Yet, risk management practices in many institutions appear to be significantly less developed or mature than the corporate sector. This may be that universities’ governance arrangements and processes make it more difficult to implement institution-wide risk management practice. However, the unfolding COVID-19 pandemic that started early this year is pushing institutions of higher education to embrace risk management as one of the key tools to help re-think and reshape their strategies for survival and sustainability. The pandemic has further compounded risks already faced by higher education including rising costs, uncertainty about government funding and endowment, and the changing landscape of learning and learners. This webinar will help higher education leaders discuss simple but critical questions: what is our mission (sense of purpose)? What is the strategy to achieve it? What are the risks that might impede the achievement of the mission? How is the institution prepared to manage and successfully mitigate these risks?

This webinar will provide the participants with step-by-step applications of risk management in higher education supported by hands-on risk assessment and analysis tools, techniques and cases. Participants will be given opportunities to discuss their experience in managing risks and how to overcome the challenges to effectively deploy risk management activities and build an institution-wide risk-aware culture.

Webinar Objectives

By the end of the webinar participants should be able to:

- Understand the steps involved in the risk management process
- Discuss the governance arrangement needed to support the implementation of risk management effectively
- Learn the concept of risk appetite and how to apply it to inform critical decisions and actions; and
- Reflect on the pitfalls of implementing risk management in higher education
- Learn through examples and case studies how higher education institutions have successfully embraced risk management as a standard

Target Audience

- Senior Leadership in Universities
- Risk Management Managers and Staff
- QA and Institutional Effectiveness Staff
Overview

The Covid-19 pandemic has introduced all sorts of new challenges for researchers in the form of unanticipated disruptions to scheduling and the need to using technology to meet and collect data. The changes that we have made as a result of the pandemic can be of enormous benefit in the future provided we are able to incorporate them into research planning and management in a coherent fashion.

However, perhaps the most important lesson from the pandemic has involved the need for researchers to grapple with complex, unbounded problems. Covid-19 is a problem not only involving the need to explore the impact of the virus on the human body but also to investigate the impact of measures intended to contain its spread on all areas of social and economic activity. As we have seen, addressing Covid-19 requires approaches which look at a problem from multiple perspectives in different disciplines to ensure that all its aspects receive attention.

Covid-19 is but one example of what the literature calls a ‘wicked’ problem – a problem that is complex, ill-defined and unbounded. As our world becomes increasingly interconnected, it is likely that we will face more of these types of problems and this will require the development of the capacity to address them.

This four-hour interactive webinar will explore challenges and opportunities for those managing and leading research in institutions and for anyone interested in enhancing their own capacity as researchers. It will do this by discussing how ‘interdisciplinary’ could become ‘a new normal’ and what we can do to develop capacity to work in this way as researchers. In addition, the webinar will offer an opportunity to engage in a guided and supported discussion with colleagues from a range of locations about, for example, the way they have used technology to allow research to continue over recent months and the way it can continue to be used productively in the future.

Webinar Objectives

By the end of the webinar participants should be able to:

- Understand the dynamics of complex, unbounded problems requiring research
- Identify the implications of such problems for research design, planning and management
- Identify the benefits and downsides of the use of technology in different kinds and stages of research
- Identify the implications of project research for funding and funding management
- Manage and lead research teams more effectively

Target Audience

Anyone involved in managing, leading or driving research in institutions of higher education.

- Research managers and directors
- Deans & Heads of Departments
- Academics interested in developing their own research capacity
Overview

The COVID-19 pandemic has created an urgent need for more effective and responsive governance systems across the higher education sector with much stronger and more frequent collaboration between Governing Boards and leadership/management in order to rapidly address an extreme and unprecedented situation that has significantly disrupted and impacted the sector both on the short and long term. Boards provide strategic directions, guidance and play a crucial oversight role; in such times they should also assist management not only with how they respond to the crisis but how they recover from it with resiliency and strength. Moreover, Boards play an important part when it comes to communication and public reporting and safeguarding their institution’s reputation.

This four-hour webinar aims at addressing the impact of the pandemic on university governance and discuss what it takes from governing boards and management to collectively navigate through this crisis and ensure they build institutional resilience and relevance and maintain business continuity.

Webinar Objectives

By the end of the webinar participants should be able to:

- Recognize the changing patterns of governance of higher education landscape in times of uncertainty
- Understand the impact of the COVID-19 on the sector and what it takes from HEIs to navigate through the crisis and beyond
- Comprehend the distinction between governance and management and where do they intersect
- Determine the role of Governing Boards in providing strategic insights, enhancing oversight, ensuring business continuity and overseeing risks in times of uncertainty
- Identify management role in effectively responding to the COVID-19 pandemic on the short, medium to long term
- Establish sustainable evidence based strategies for implementing transparent, shared and responsive governance systems
- Examine the importance of institutional values during times of uncertainty

Target Audience

The webinar is relevant to:

- Members of Governing Boards from both private and government higher education institutions (HEIs)
- Senior Administrators within HEIs including: Presidents, Vice Presidents, Provosts and other similar post holders
- Managers and staff working in QA offices, Risk Management and Institutional Effectiveness
Overview

Higher education is one of the major forces shaping social, cultural and economic well-being of business and communities. The emergence of the COVID-19 pandemic has forced institutions to rethink traditional ways of doing things to sustain these contributions and stay relevant now and in the future. Undoubtedly, it is testing the limits of the entire HE model. HE institutions must start asking themselves questions about the medium- and long-term implications for curriculum delivery, assessment, research, student support services, quality assurance, infrastructure, campus administration, staffing and workplace changes. While finding answers to these questions, the main objective is to create an organization that can ensure safety and keep essential operations going, while establishing more effective and strategic decision-making systems for the future.

During this webinar, you will be engaged to discuss these questions and how HE institutions are transforming themselves to navigate this crisis, the business model they aspire to build moving forward. An important of this webinar is to share the policies and strategies needed for institutions to survive in this journey of change.

Webinar Objectives

At the end of this webinar, participants should be able to:

- Discuss how leadership in times of crisis is transforming HE institutions
- Design responsive policies to ensure institutional quality and relevance
- Build strategic competence in times of crisis
- Learn through cases on how institutions are navigating and building resilience in the face of COVID-19

Target Audience

The webinar is relevant to:

- Senior Administrators within HEIs including: Presidents, Vice Presidents, Provosts and other similar post holders
- Managers and staff working in QA offices, Risk Management and Institutional Effectiveness
Overview

Higher education institutions are now more than any time coping with severe disruptions amid the coronavirus pandemic. In response to this evolving crisis, these institutions, which was enjoying not long ago a relatively stable working environment, are now shifting, and many leaders are scrambling to support their faculty, staff, and students. One of the areas affected by this crisis is student support services. Undoubtedly, it is challenging institutions to review the vital role this function can play in times where working remotely has become the new normal and student services such as academic advising, counseling, and orientation, have to shift entirely online. A challenge not many institutions have been ready to face.

The main questions we ask in this webinar are: how can student services support divisions accelerate adaptation of technology to facilitate access and increase service efficiency and effectiveness in times of uncertain? What are the critical services that must continue to successfully maintain an operationally fit division? How to humanize student support services during the Covid-19 pandemic? What are the policy changes needed to mitigate the threat of this crisis? What are the core competencies required for student services’ leaders and professionals in times of crisis?

This webinar addresses these questions and others in an interactive way providing opportunities for the participants to share experiences and address real issues being faced during the Covid-19 pandemic. The webinar will also expose participants to cases and lesson learnt from institutions adopting various student support strategies to reduce the impact of this pandemic.

Webinar Objectives

At the end of the webinar, participant should be able to:

- Discuss the new challenges facing student services and their implications for student learning, retention, progress and success;
- Explore how student services divisions can accelerate the adoption of technology to transform their services and work processes;
- Discuss policy changes needed to mitigate the risk of Covid-19 pandemic;
- Priorities the critical services and activities as part of the division’s business continuity plan;
- Determine the enabling competencies for a successful student services division in time of crisis.

Target Audience

The webinar is relevant to:

- Deans, Directors and Staff working in Student Affairs;
- Deans, Directors and staff working in Admissions and Registration;
- Career Counselors.
Overview

An electronic portfolio (e-portfolio) or a digital portfolio is a purposeful collection of sample student work, demonstrations, and artifacts that showcase student’s learning progression, achievement, and evidence of what students can do. Digital portfolios have the potential to revolutionize the teaching and learning process through providing ways in which we can capture each student capabilities in a way that standardized tests or end-of-course summative exams simply cannot.

This webinar is designed with the aim of supporting faculty members and teaching staff wanting to integrate the use of digital portfolios in their teaching and learning with the necessary foundational knowledge, skills and abilities. The emphasis will be on using digital enabled portfolios rather than paper based ones; although both approaches will be highlighted.

During the webinar, participants will take an in-depth look the benefits of using digital portfolios, their different types and uses in teaching and learning; they will discuss the main components of a portfolio as well as the process of assembling one using suitable technology platforms. Participants will also learn how to guide students with selecting source of evidences, structure their digital portfolio, reflect on their artifacts and regularly review and maintain their portfolios.

Webinar Objectives

At the end of the webinar, participant should be able to:

- Understand the benefits of using digital portfolios in teaching and learning to showcase student learning and demonstrate growth over time
- Identify the different type of student portfolios and their use in teaching and learning
- Make decisions about their digital portfolio structure, components, type of evidences and reflections required by students
- Explore a variety of software tools for the creation of digital portfolios
- Use portfolios as means of alternative assessment
- Plan the use of digital portfolios in your course

Target Audience

The webinar is relevant to:
- Educators, Faculty and Teaching
- Staff working in Higher Education
- Deans Heads of Departments
- Staff working in Teaching and Learning Centers
Overview

There has been an increasing shift towards online learning by universities, colleges and schools amid COVID-19 as to promote the continuity of learning in different parts of the globe. eLearning has become more than ever widespread and this phenomenon is expected to continue beyond the pandemic as anticipated by many experts in the field. More specifically many institutions are considering the use of blended and flipped learning post COVID-19 as one of the ways to bring the best of face to face and online learning.

The aim of this interactive webinar is to introduce participants to the definitions and fundamental principles of online teaching, blended learning and flipped learning and offer them a range of tips and guidelines that will help them better engage students and create an exciting learning experience.

Participants will also explore how they can effectively plan their flipped course considering aspects related to course content, active learning and student engagement giving the instructor a better opportunity to deal with mixed levels, student difficulties, and differentiated learning styles during the in-class time.

Webinar Objectives

At the end of the webinar, participant should be able to:

- Understand the main differences between teaching face to face (f2f) and teaching online, blended or in a flipped classroom
- Understand the components of a Flipped course and how to successfully implement it in class.
- Comprehend the advantages and challenges of teaching a flipped class
- Consider different possible formats and scenarios for flipping your course
- Implement active learning strategies to engage students and help them effectively achieve the course level learning outcomes
- Draft a plan for effectively flipping your course
- Learn about how to effectively manage your flipped course

Target Audience

The webinar is relevant to:
- Educators, Faculty and Teaching Staff
- Deans and Heads of Departments
- Staff working in Teaching and Learning Centers
Overview

Universities have always been connected to the community by virtue of their long-standing mission and commitment to deliver quality teaching, research and service to society. However, since the COVID-19 pandemic started early 2020, these core areas have been profoundly disrupted, forcing institutions to rethink their business model in ways to sustain these contributions and stay relevant now and in the future. Having said that, the effects of the crisis has arguably further reinforced the priority of community engagement during and post COVID-19. This emphasis has been evident from the ways in which universities around the world have quickly mobilized their knowledge and resources to respond to the crisis by addressing a range of societal needs. There have been outstanding examples of researchers and professionals engaging with the media to share expertise, and finding opportunities to participate in research on SARS-CoV-2.

During this webinar, you will be engaged to discuss how community engagement as a strategy (not a program) can be instrumental in your institution’s mission during crisis; how to effectively plan activities and leverage mutually beneficial partnerships with tangible outcomes; how to deploy internal resources and core capabilities to target communities’ specific need.

Webinar Objectives

At the end of the webinar, participant should be able to:

- Discuss community engagement as a strategy during crisis.
- Recognize the value of partnership as a critical success factor in community engagement.
- Discuss how institutions leverage their core competencies to maximize impact on the community, student learning and the curriculum.
- Share methods of engagement for effective community engagement planning and communication.

Target Audience

Directors and Staff working in community engagement programmes.
Overview

Policies are essential to Higher Education Institutions (HEIs) as they clarify the expectations from various members of the community, provide a framework for institutional integrity, promote consistency, efficiency and effectiveness, help mitigate and manage institutional risks and supports compliance and adherence with accreditation requirements.

However, despite the ‘well-known’ benefits of having well-designed, consistent and ‘fit for purpose’ institutional policies and procedures; developing these can be a daunting activity for Universities and Colleges; in particular given the very complex nature of Higher Education and the various internal and external influencing factors.

The aim of this webinar is to provide those with policy drafting, management and/or review responsibilities with an opportunity to explore how good policies can be formulated, implemented, regularly assessed and reviewed from a system perspective. The webinar will expose participants to a six-phase policy development life cycle process which can be easily adapted to different institutions. The relation between institutional mission, values, strategic goals, internal and external quality assurance and policies will be addressed throughout the session.

Various strategies and approaches to improve compliance will be discussed as well as the link between policy compliance and risk management.

Webinar Objectives

By the end of the webinar participants should be able to:

• Get an understanding of the key elements of better practice in policy development and review from a system-wide perspective
• Understand the process for policy development, implementation, monitoring and reviewing of policies and how to analyze monitoring indicators
• Build institutional frameworks and processes for defining, formulating, implementing, overseeing, assessing and reviewing institutional policies in participatory manner.
• Write clear, concise and coherent policies which are aligned with the institutional mission, core values and strategic goals
• Develop a policy register and create accessible policy websites
• Reflect on current institutional practices related to policies’ development, implementation, evaluation and revision

Target Audience

• Directors and staff working in quality assurance and institutional effectiveness offices
• Manager and staff in charge of overseeing the process for policy development and implementation
• Staff in charge of compliance programs and risk management
• Vice Presidents, Deans of colleges and schools interested in policy development
Overview
Building an online learning community is neither automatic nor simple to achieve. We have to understand the structural elements of social learning and learners’ motivational layers. Community interactions are unpredictable and require planning and commitment on the part of the instructor. In order to promote the use of forums and other community spaces and enhance student perceptions of their learning, it is important that students are aware of the benefits of peer and collaborative learning.

This four-hour webinar will emphasis on the concept of building learning communities and the role of the instructor and students play. It will discuss specific pedagogical strategies for instructors to consider; in addition to presenting a wide range of methods and tips found useful for building or maintaining a strong sense of community will be shared throughout the session.

Webinar Objectives
At the end of the webinar, participants should be able to:
- Understand the importance of online community building and teaching the whole student for student learning and academic achievement.
- Apply specific methods and strategies to build strong learning communities
- Integrate the concept of peer and collaborative learning in courses and teaching
- Use virtual spaces and asynchronous and synchronous communication tools to strengthen learning community ties.
- Understand the role of instructors and how to establish an online presence to create high impact on student learning Reflect on your current teaching practices and share experiences with other participants

Webinar Key Topics
- What is an online learning community?
- The Key characteristics of learning communities
- Barriers and Challenges in building learning communities
- Classroom community building
- 3 R’s of Learning Communities: RESPECT, RELATIONSHIPS, and RELEVANCE
- The role of instructors and how to establish an instructor’s presence
- Promoting peer and collaborative learning
- Ways to build online learning communities
- Using virtual spaces and social media Flexible options for building learning communities

Target Audience
The webinar is relevant to:
- Deans of Colleges/ Faculties
- Faculty and teaching staff members
Overview

The quality of the syllabus is a fairly reliable indicator of the quality of teaching and learning that will take place in a course (Woolcock, 2003). Although courses may vary in duration, subject matter or level, a systematic process helps plan and structure your course and syllabus to effectively reach desired instructional goals & student learning outcomes. The process of developing a syllabus can be a reflective exercise, leading the instructor to carefully consider his or her philosophy of teaching, why the course is important, how the course fits in the discipline, as well as what topics will be covered, when assignments will be due, and so on (Eberly, Newton, & Wiggins, 2001; Grunert, 1997). This webinar aims at highlining the fundamentals of course design which should be integrated when developing or reviewing a course syllabus. It will emphasis on special considerations instructors must take for the delivery of their courses in an the online/ blended format and how to embed the key themes of the MoE student experience survey when designing their courses.

Webinar Objectives

By the end of the webinar, participants will be able to:

- Discuss the importance of developing course syllabi that integrate the key components of a comprehensive student experience
- Describe the process of backward design and constructive alignment
- Articulate/ review SMART learning outcomes that embed the concepts of critical thinking, authentic and collaborative learning
- Explore various innovative teaching and assessment strategies to attain the course learning outcomes and achieve the 21st century student skills.

Key Topics

- Purposes of Course Syllabus
- What constitutes a good course syllabus?
- Common Components of a course syllabus
- Embedding component of the MOE student experience survey
- Considerations for online/ hybrid course delivery
- Backward design & Constructive Alignment
- Writing SMART Learning Outcomes
- Thinking of your Student Assessment
- Designing Learning Activities
- Using Weekly plans – Gagne’s 9 Events of Instructions
- Estimating course workload
- Including course policies
Overview

Curriculum mapping is your blueprint to curriculum alignment and coherence. It acts like a roadmap connecting course-level outcomes, program-level goals and the mission of the institution, providing clarity to faculty and students about how the curriculum is designed and structured to achieve success. Importantly, it is a faculty-driven process where faculty members work collaboratively to identify, monitor, evaluate and control the balance between program goals and courses offered. Additionally, through well-articulated curriculum mapping students are given the opportunity to understand what is expected of them, and what they will accomplish from different courses and program components.

This webinar will provide participants with an opportunity to deepen their insights into the utility and benefits of well-crafted curriculum maps creating a visual guide linking program goals and courses. It will also enhance the participants' contributions to effective program’s assessment planning and execution. Practically, the webinar will primarily expose the participants to curriculum mapping through various tools and matrices as well as case examples from other institutions of higher.

Webinar Objectives

By the end of the webinar, participants will be able to:

• Discuss the concept of the curriculum mapping as a tool for curriculum alignment, analysis and improvement.
• Describe the curriculum mapping process
• Describe the different layers of curriculum mapping and need for integration
• Apply the process of curriculum mapping to selected programs and courses in Ajman University
• Explore the use of Moodle in curriculum mapping

Key Topics

• Curriculum mapping as a tool for curriculum alignment, analysis and improvement
• Challenges and pitfalls in effectively implementing curriculum mapping
• Curriculum mapping process
• Layers of curriculum mapping
• Applying curriculum mapping to selected Ajman University’s programs and courses.
• Using Moodle in curriculum mapping
Overview

Action research can be a very powerful tool for faculty development and empowerment considering the dynamic and ever-faster world which enables the co-creation of both practical knowledge and new theoretical concepts. Action Research refers to the reflective process that allows for inquiry and discussion as components of the “research.” Often, action research is a collaborative activity among colleagues searching for solutions to everyday, real problems experienced in schools, or looking for ways to improve instruction and increase student achievement.

Rather than dealing with the theoretical aspect, action research is a pragmatic and participatory approach in which academic researchers collaborate to address those concerns that are closest to them, ones over which they can exhibit some influence and make change.

This half day webinar will acquaint with participants with action research; where they will explore their research question in its practical and theoretical dimension. It will provide them with tools, strategies, and approaches for doing research in the classroom. Participants will discuss how to plan action research and write up a report about of their findings.

Webinar Objectives

By the end of the webinar participants should be able to:

- Explore the concept and processes of action research and what it can offer faculty members who want to conduct investigations in their own classrooms
- Develop an action research focus, decide on classroom interventions, and collect and analyze data to inform decisions about further practice
- Formulate questions about your own teaching practice, or questions about a teaching practice you want to try
- Improve how to address issues or problems via rigorous inquiry and reflection
- Plan and develop a comprehensive plan for implementing action research
- Write up reports about action research findings

Webinars Key Topics

- What is action research and what it is not: Definitions and concepts
- What constitutes good action research?
- Benefits of Action Research
- Types of Action Research
- Action Research Modalities
- Steps for Developing Action Research
- Role and Purpose of Reflection in Action Research
- Developing plans for action research
- Action research ethical considerations and quality criteria
Overview

Managing research projects is a key skill in being an effective researcher. Yet project management is often poorly understood, which in turn can lead to projects running out of time and resources, and overworking people.

The aims of this webinar is to provide an overview and in-depth insight on the principles for planning and managing research projects by improving project management skills of participants. Participants will learn how to apply project management principles to typical types of research projects in academia - the main point being to keep a defined project running efficiently, so that it finishes on time and on budget, and achieves its original aims.

Webinar Objectives

By the end of the webinar participants should be able to:

- Identify the key skills and competencies required to successfully manage research projects
- Explore the core research project management stages necessary for delivering research objectives on time and on budget
- Recognize top challenges research project managers face and determine solutions for handling them
- Create and implement a plan for a research project and effectively manage the research project team
- Ensure the project will complete within timeframe and resource limitations.

Webinar Key Topics

- Research Projects: Common nature and structure
- Top challenges in managing research projects
- Defining a project: Coming up with the research idea

- Research projects key stages
- Budgeting and financial management
- Managing team members
- Running effective project meetings
- Monitoring and reporting progress of the research project
- Closing a project
HOW TO REQUEST THE WEBINAR?

Step 1:
Send us an email at inquiries@cli-cks.com detailing
1. the webinar(s) you are considering
2. the number of participants
3. three tentative dates along timings

Step 2:
One of our team members will get in touch to either obtain further details or provide cost estimate

Step 3:
An agreement will be sent to your institution for signature and issuance of the payment. This is what formalizes the engagement and initiates the preparation for the webinar

Step 4:
The webinar is delivered and e-Certificates are issued
